POSSIBILITIES IN LIFESTYLE TECHNOLOGY

BASIC

Lighting, Curtains/Blinds Automation for the Whole House.

INTERMEDIATE

Multimedia & Security Integration on a Single Platform.

ADVANCED

Multi Axis Motors, Acoustics, Audio/Video Multi Streaming.

Future Proofing the whole house and seamlessly designing it in a way that devices bought later can be just plugged and played, for this provision needs to be taken before hand.

AUTOMATION FOR ANY ELECTRONIC OR ELECTRICAL DEVICES

BED ROOMS, DRAWING & DINING ROOMS, LIVING ROOMS AND PARTY HALL

Whether you have a large bungalow spread across a fancy landscape in the hills or a slick apartment in a plush condominium, we will help you manage all Lighting, Curtains, Blinds, Music, Television, Set Top Boxes, Home Theaters, Heating or Cooling and Security by integrating all of this on a Single Application.

We will create an experience so unique it will blow your mind away.

> Press Lounge when your guests are about to enter your home and find the curtains being drawn apart and sheer closed, lights dimmed to 60 percent brightness, music gets turned on, Television gets switched off and the room cooled just at the right temperature to welcome your guests.

REACHING HOME AFTER A HOT & EXHAUSTIVE DAY

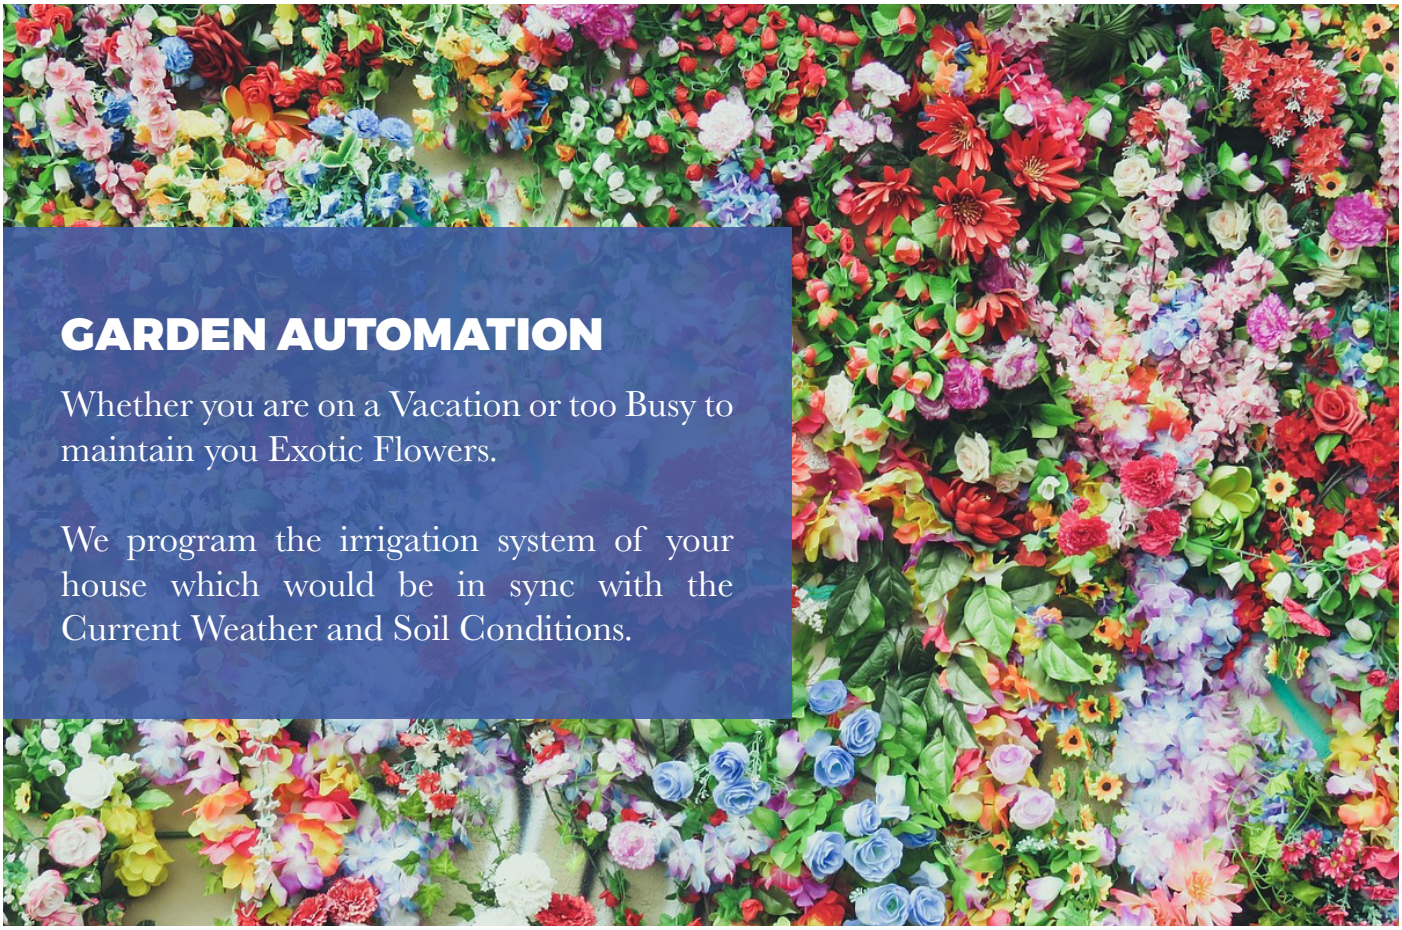
Start your AC fifteen minutes before you Reach with the help of
Remote Access

WAKING UP

Synchronize your Curtains and Blinds with your Sleep Cycle.

Get up with Natural Light every morning. As Blinds and Curtains get drawn slowly over a period of time your room will get filled with Bright Natural Sun Light.

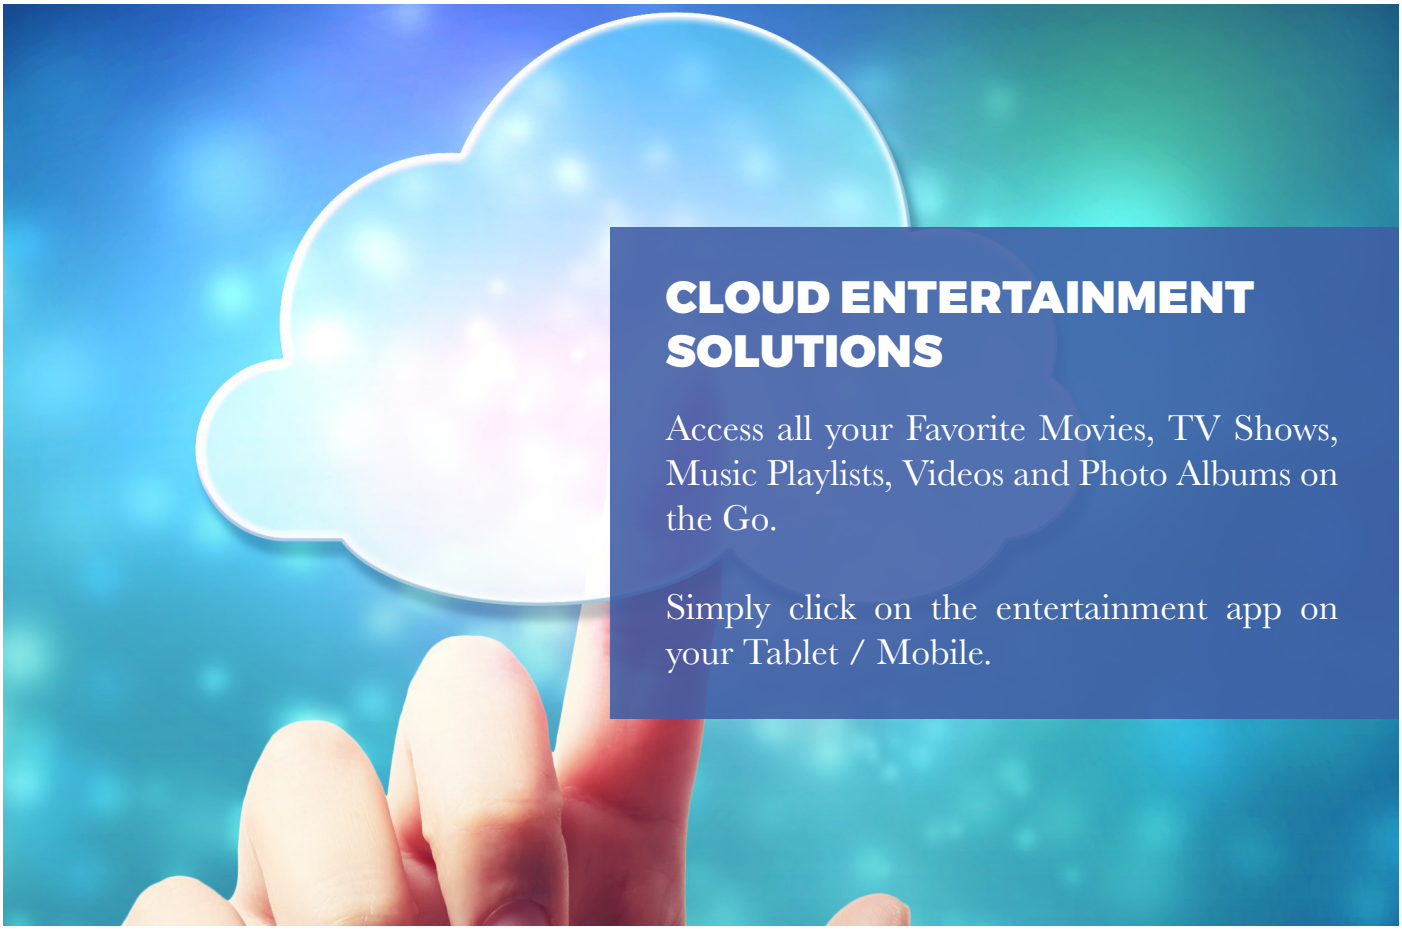
Wake up in Peace, With no Nuisance of Loud Alarms.



GARDEN AUTOMATION

Whether you are on a Vacation or too Busy to maintain you Exotic Flowers.

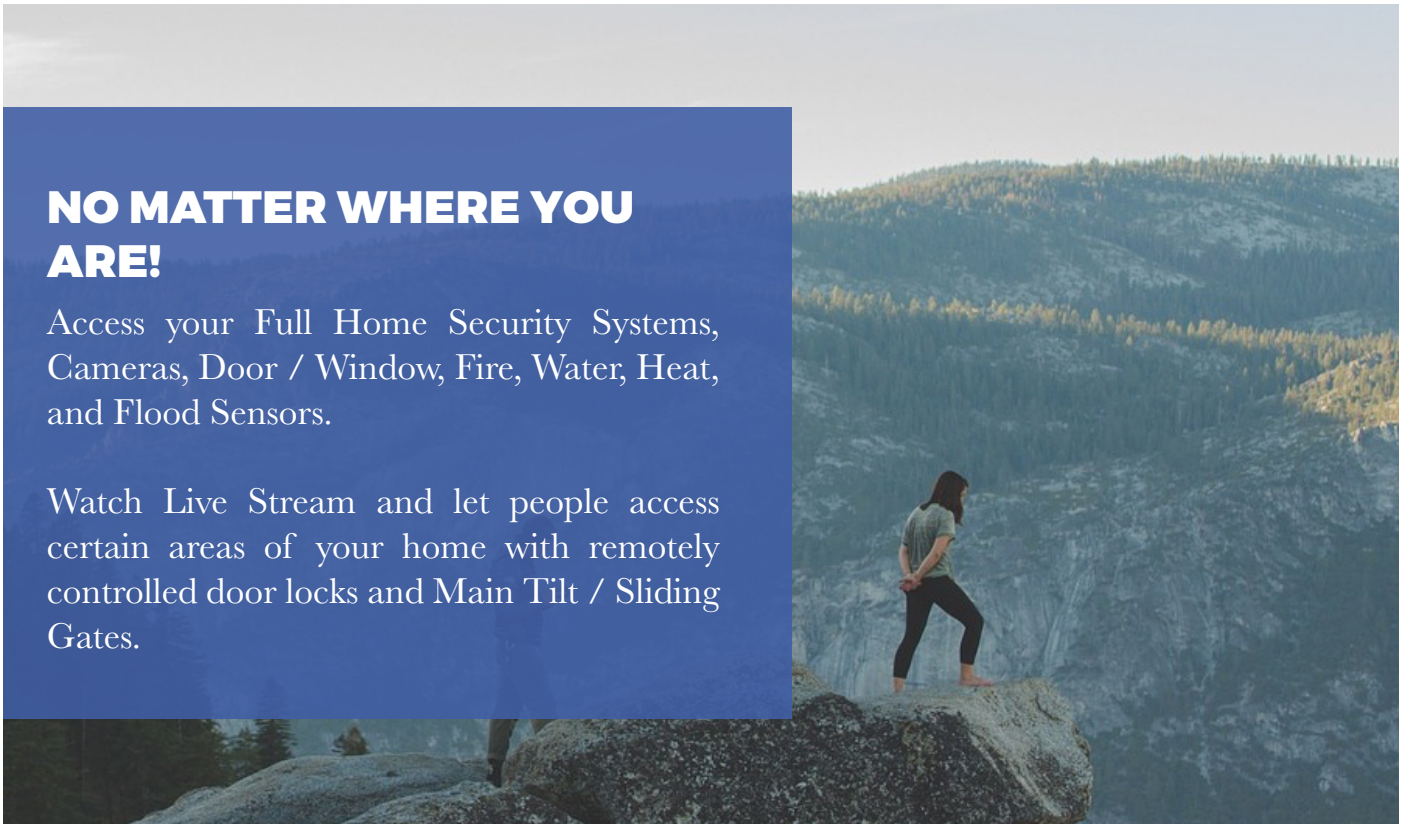
We program the irrigation system of your house which would be in sync with the Current Weather and Soil Conditions.



CLOUD ENTERTAINMENT SOLUTIONS

Access all your Favorite Movies, TV Shows, Music Playlists, Videos and Photo Albums on the Go.

Simply click on the entertainment app on your Tablet / Mobile.



NO MATTER WHERE YOU ARE!

Access your Full Home Security Systems, Cameras, Door / Window, Fire, Water, Heat, and Flood Sensors.

Watch Live Stream and let people access certain areas of your home with remotely controlled door locks and Main Tilt / Sliding Gates.

AUTOMATED WINTERS

Wake Up Every Morning and Return Home Every Evening to Enjoy a Warm Water Bath without Wasting Electricity the whole day.

Always Enter a Warm & Cozy Room for Sleep.

Customised Winter Modes for Your Convenience.

We also provide Advanced Automation Solutions for Flooring, Furniture and Home Theater Development which can be discussed at the time of Planning.

SECURITY

MAKE YOUR HOUSE SECURED AND ACCESSIBLE ON YOUR FINGERTIPS WHEREVER YOU GO!

- **Sensors for Doors, Windows, Motion, Flood, Fire and Smoke.**
- Integrated sensors for Earthquakes.
- High Decibel Alarms and Strobe Lighting to alert and cause Panic to the Intruder.
- **High End 360° Security Cameras with Recording on detection of Motion.**
- Top of the Line Digital Door Locking Systems.
- Sensors with which you would even tell you the **total number of people present inside your house during a party or function.**
- **All our Sensors would have built in Tamper Protection systems** – Notification in case someone tries to move them.
- Reminders for Arming and Disarming the House.
- Gas Leak Detection Systems.
- **Programming Panic Modes in which Necessary Lights Automatically Switch On to guide you to Exit from Home, Doors get unlocked by themselves and Devices which aren't required get switched off to avoid further damage.**

All the above systems would be controlled on your iPad, iPhone, Android Phone or Tablet devices from anywhere in the World on a Single Application

We will program scenarios on triggering of any of these devices customized as per your need.

Kunal Sabharwal is the founder & CEO of Dextro Inc. He founded the firm in early 2014 after a stint in Management Consulting.

Equipped with a degree in Electronics & Instrumentation engineering, he decided it was time to innovate in this field. He had a simple vision: To make best-in-class integrated homes adopting state-of-art technology. Being an avid tech buff himself, Kunal says he wanted people to be able to «Live efficiently by embracing technology as if it were a daily part of our lives".

Kunal has consulted & executed Integration projects like vacation homes, plush bungalows and metro apartments across the country. Today he is a global CEDIA ESC-T certified member & ISF Advance Level 2 certified video calibrator. Only a handful of Custom Integrators in India have achieved this qualification. International collaborations with European and American manufacturers have fruitfully ensured emphasis on quality as well as product design.

DEXTRO'S PROJECT APPROACH

We have developed a very Effective & Unique Model to Approach & Structure our projects.

The ***EM +2*** (pronounced as 'M plus 2') model. This is so robust that it leaves Zero Room for Error, Highly Efficient Execution, setting us a Class Apart in the market and helping us achieve an extremely High Customer Satisfaction.

Throughout the project the EM (Engagement Manager) is assigned to be associated with you from Planning to Execution as well as all Post Sales interaction.

He would be responsible for all the communications and would be a Single Point of Contact (SPOC) between you, the architect and the interior designer.

All you would need to do is sit back and leave us to manage the details and all technical nitty-gritty.

WAY FORWARD

Consult → **Plan** → **Execute**

The EM would help you throughout your journey via customized planning to build your Perfect Smart Home.

1. Consulting and Planning would comprise of 1 to 1 sessions, helping you with designing your smart home end to end and giving you solutions from around the globe.

2. Circuit layout of a fully automated house as well as for security features along with custom designing on CAD (Drawing Files).

3. Schematics and Ideas for Fully Future Proofing the Whole House with Gadgets (You could invest in these products in future, but provisions are to be taken before hand as once the house is built you may not be able to add these products later).

4. We would provide Full Automation Features implementable and Innovative Lighting Ideas for each room.

5. Assistance in Design Execution, Technology Compatibility and Tips to make the house look more aesthetic by concealing technology with non-invasive installation methodology.

6. Defining & Explaining Scenarios for various instances in terms of Breach in Security, Arrival of Guests, Vacation Mode, Sleep Mode, Lounge, Morning – Perfect Wake Up, Home Arrival, Security Access etc.

7. We see this step as an investment in which the user would be completely aware of automation and its functional knowledge and would be hands on when it comes to using it.

8. End Result would be a Fully Future Proof Automated House using the Most Advance Technologies available in the World.

CEDIA members represent the world's finest custom electronic design and installation companies...which is what your home deserves.

Our members span the globe. But what binds them together is a unique thirst for knowledge. As the oldest, largest, and most highly regarded provider of education in our industry, CEDIA has helped its members set the standard for design excellence, technical knowledge, and customer service. IMAGING SCIENCE FOUNDATION ADVANCE – LEVEL II CERTIFIED

ISF Certification enables us to give your Display Devices like TV's, Plasma's and Projectors give as close an image as what the Director of the Movie or TV Show intended.

Our specialized test equipment make displays look more pleasing to the eye and a correctly calibrated TV, also ends up being «natural».

The test tools help delivering colors as close as possible to the D6500 standard used throughout the film and TV world in both Hollywood & Bollywood.

Thus making your High End AV Devices deliver Optimized output in Black and White Level Adjustment without obscuring Shadow Detail as well as Color Temperature.
